Job: A RestFull system was developed for the management of orders and stock with management of user roles and access permissions. Technologies used: FrontEnd: React; BackEnd: Laravel, JWT.

- **“E-carta/E-lista”**

03/06/2020 - 1/07/2020

Management of menus and lists

Job: E-carta and E-lista, are both systems for creating and presenting digital menus for restaurants and lists of products for whatever type of trade or commerce. Its operation consists of a monthly subscription per registered client, implemented with Mobbex, where there is a dashboard for the creation of different branches or restaurants with different menus and, not only, the creation of items for that menu, as well as photos or pdfs. This solution was implemented with Next.js on the frontend and Laravel on the backend.

- **“ACHA”**

20/07/2020 - 10/08/2020

“Asociación cultural hispano argentina”

Job: A system was developed for a Spanish association, which sought the integration of cultures between Argentina, Spain and Italy. This solution was implemented with Next.js on the frontend and Laravel on the backend.

- **“WeCoach”**

01/09/2020 - now

Training Platform

Job: WeCoach is a training and healthy platform, to help people train, through personalized online classes, nutritional diets and pre-recorded yoga classes. This system includes subscriptions by “Mercado Pago” (Like Paypal for Argentina), login management by social medias and administration dashboard for the users. This solution was implemented with Next.js on the frontend and Laravel on the backend.

- **“Almundo.com”**

06/07/2020 - now

Job: In this job I am currently, in a dependency relationship, carrying out maintenance and remodeling work on the web page developed in the Angular framework. We are currently working towards moving all code to React.

Languages

- Spanish (Native).
- English (Advance).

Professional Objective

I consider myself a proactive and responsible person, with great leadership abilities and technical knowledge, as well as social skills, capable of working in a team in a productive and efficient way; in search of overcoming and able to face any challenge.

I think that I can be a great addition to your team so that in this way you can learn the company's business and provide creative and innovative solutions.
